

MINIATURE SCENERY

INSTRUCTIONS

HECK GATE

PREPARATION

You will need:

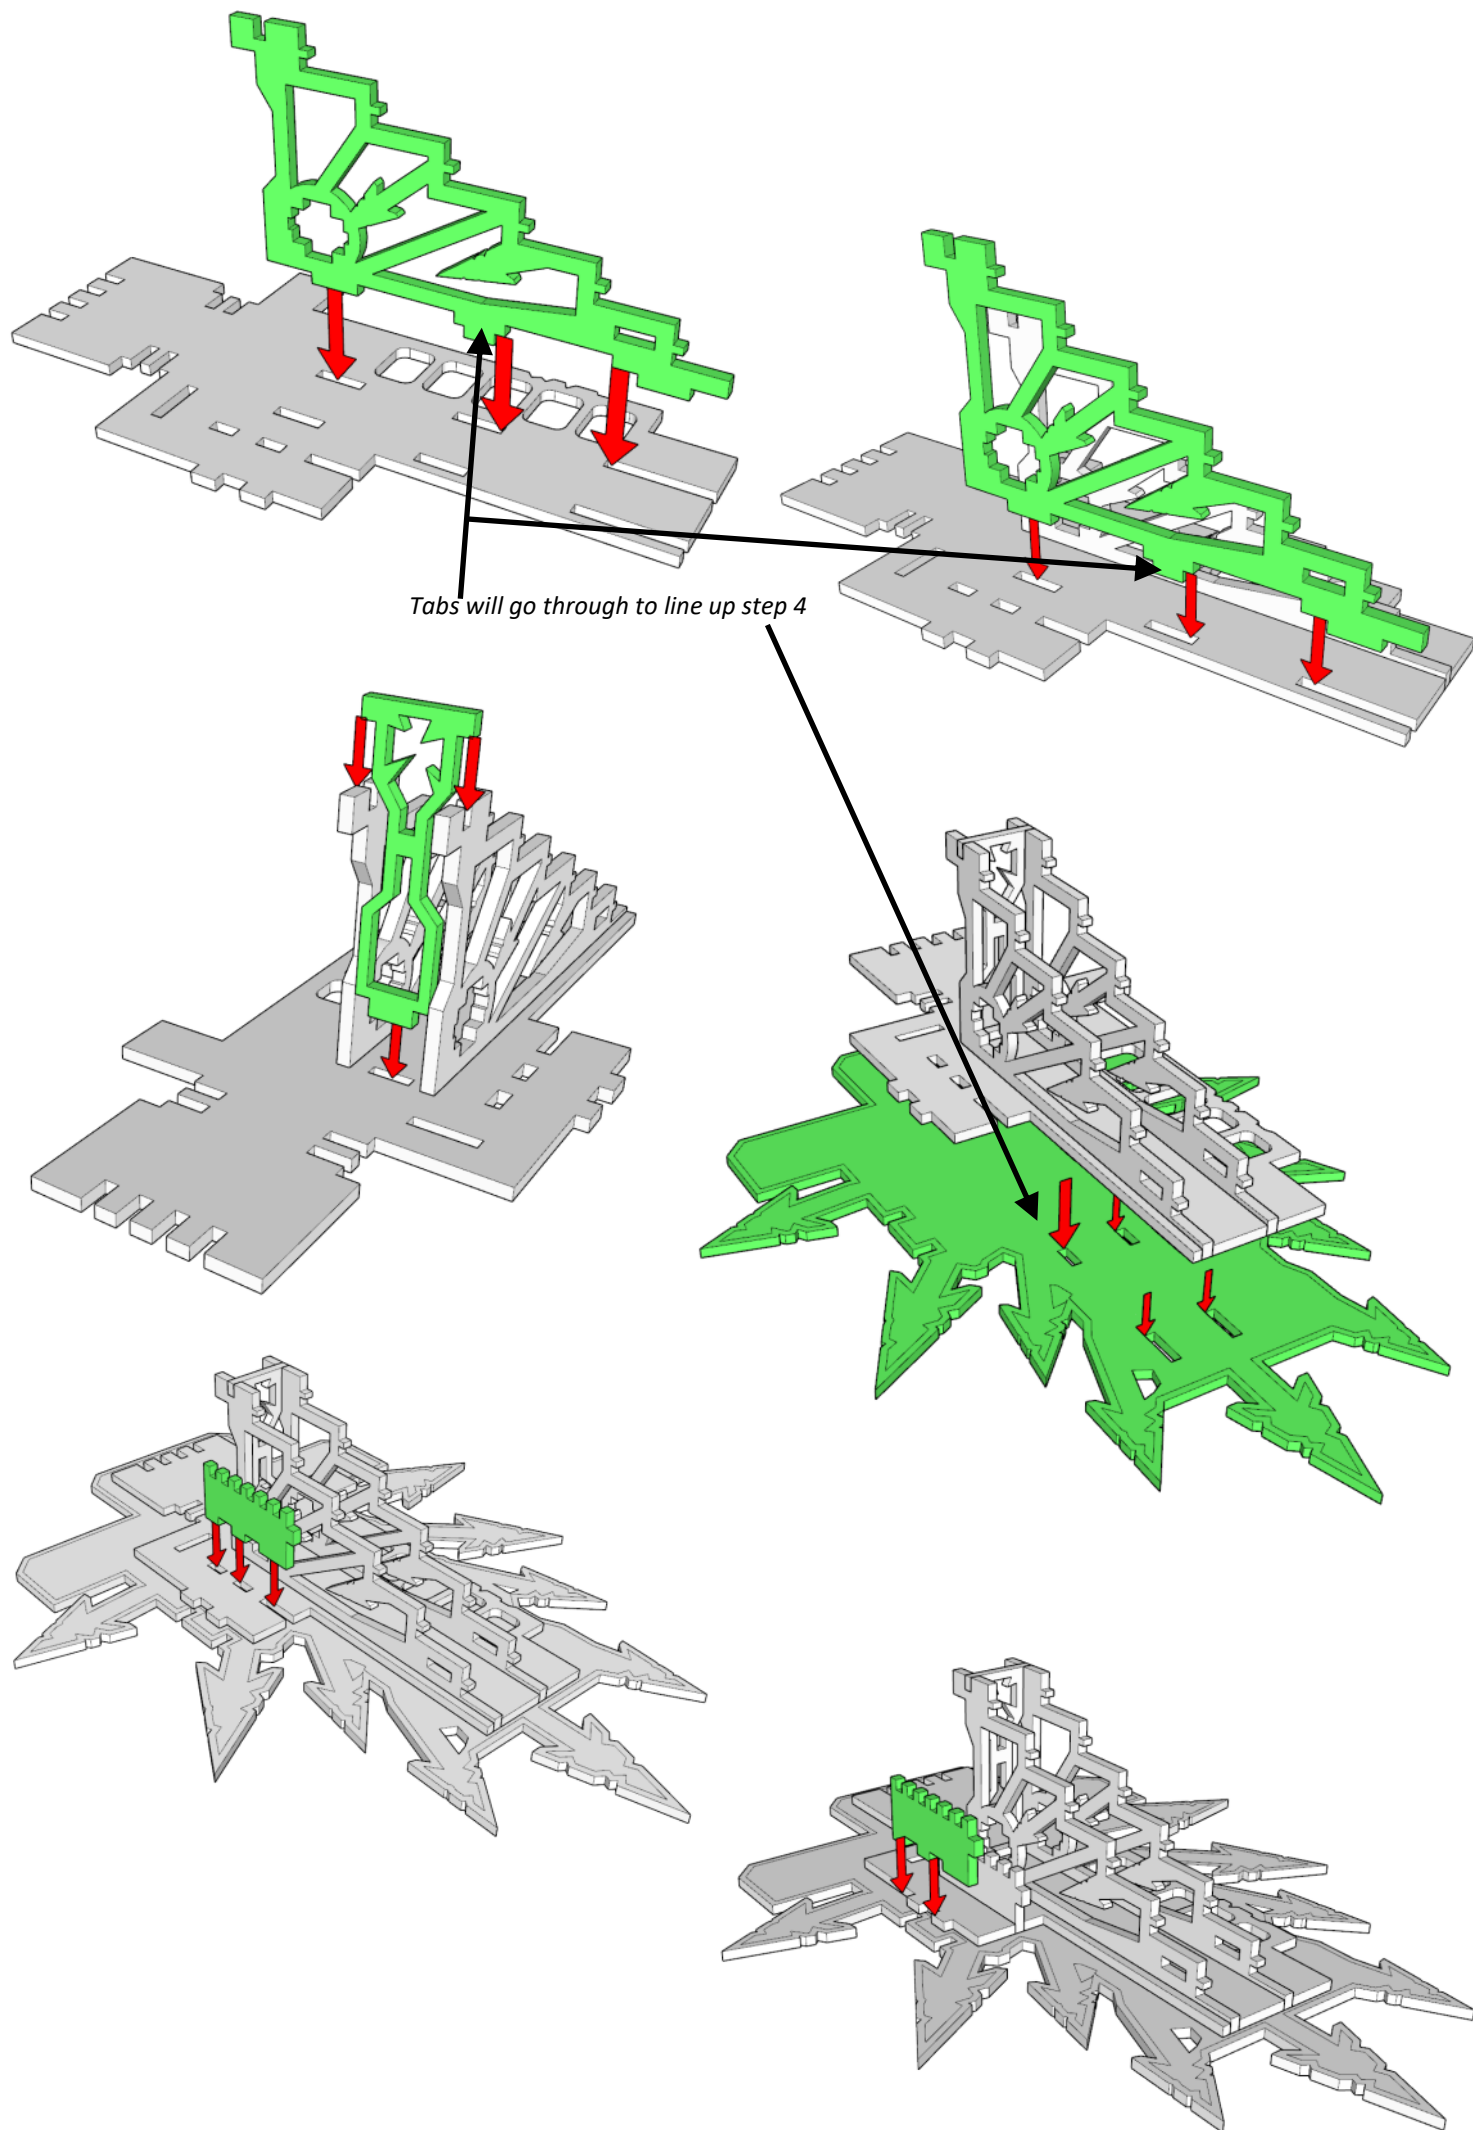

- Cutting mat or something to protect your table.
- PVA/Wood glue or superglue if you prefer.
- Small file or sand paper.
- Small blade / hobby knife

GENERAL PROCESS

- Clear plenty of table space, you will need it.
- Parts should remove easily from the board by pressing through and popping them out. It's a good idea to cut through the tiny joins first though, and some parts (particularly smaller, more detailed parts) may need more careful persuasion.
- Use file or sand paper to remove the small bur caused by the connection to the frame.
- It's a good idea to familiarise yourself with how the pieces fit together before gluing.
- Slot the parts together as shown by the pictures below, applying glue wherever there is a connection. (unless shown otherwise)
- Parts may be a very tight fit, slight trimming or sanding of parts may be needed for ease of assembly.

Make sure the ends are pressed up against the engine

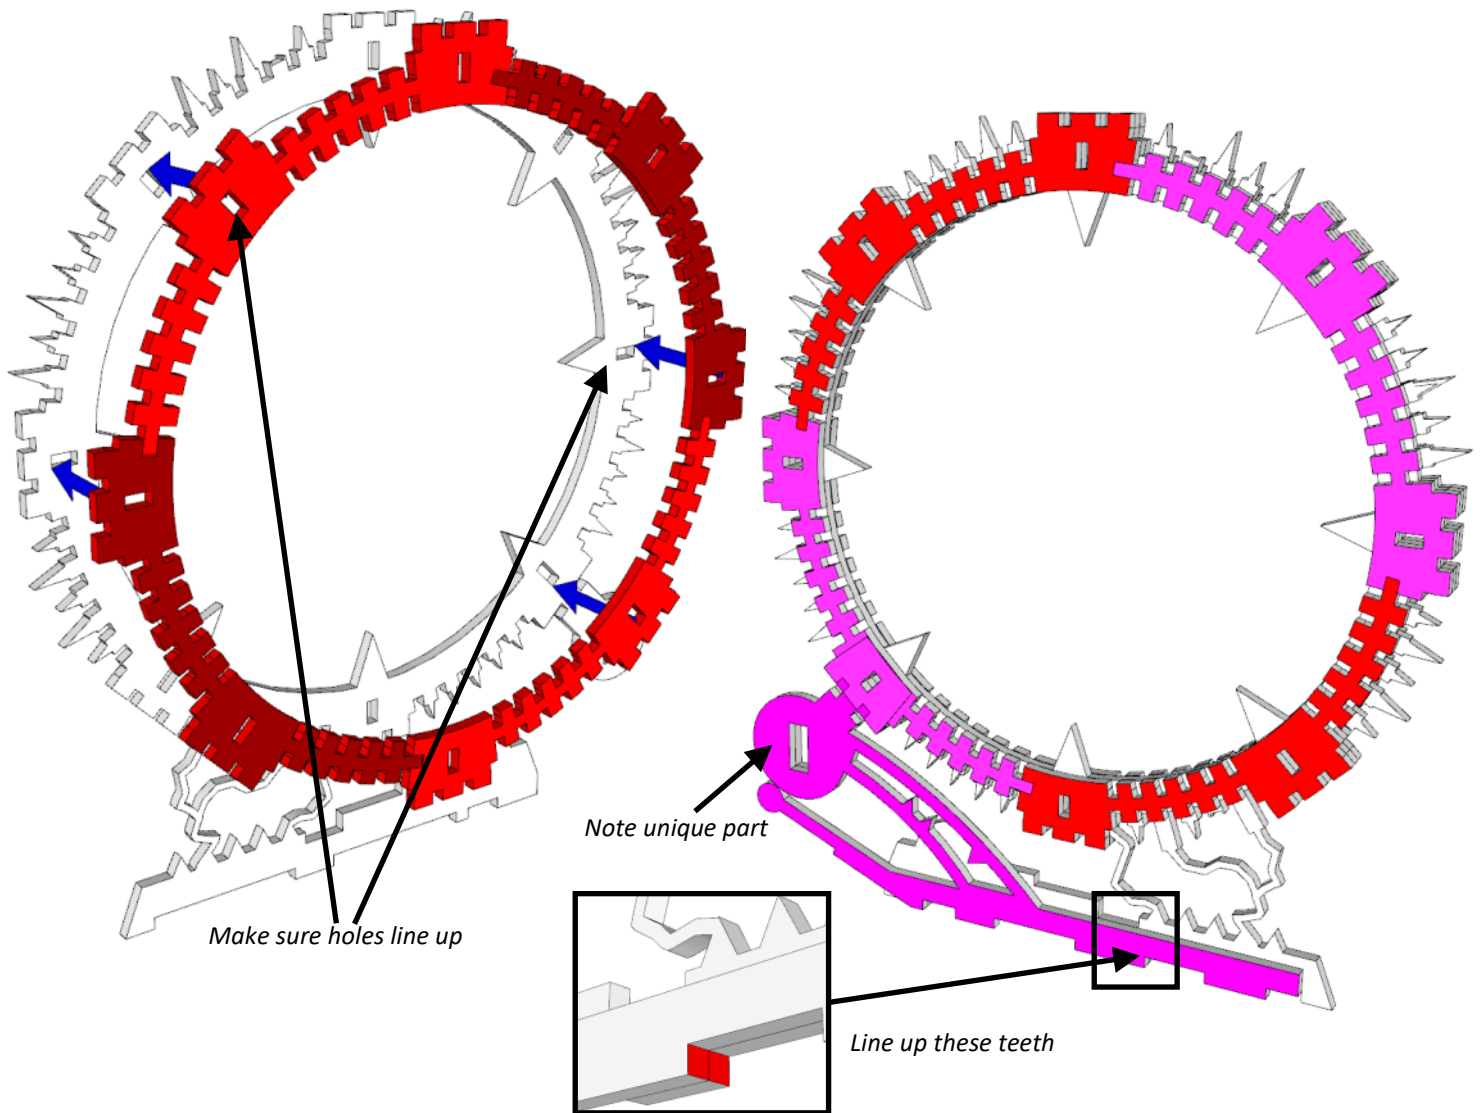

*Keep bits on this end symmetrical.
Another part needs to be placed over the end.*

NOTE: Different top step design.
Keep it off for now. Will add it later.

NOTE: Take your time with these next outer edge parts of the gate. Ensure parts are lined up to avoid issues later

This shape x8

*Unique thinner 'U' shape
for this part.*

*Arrows can be placed
anywhere*

Make it look chaotic

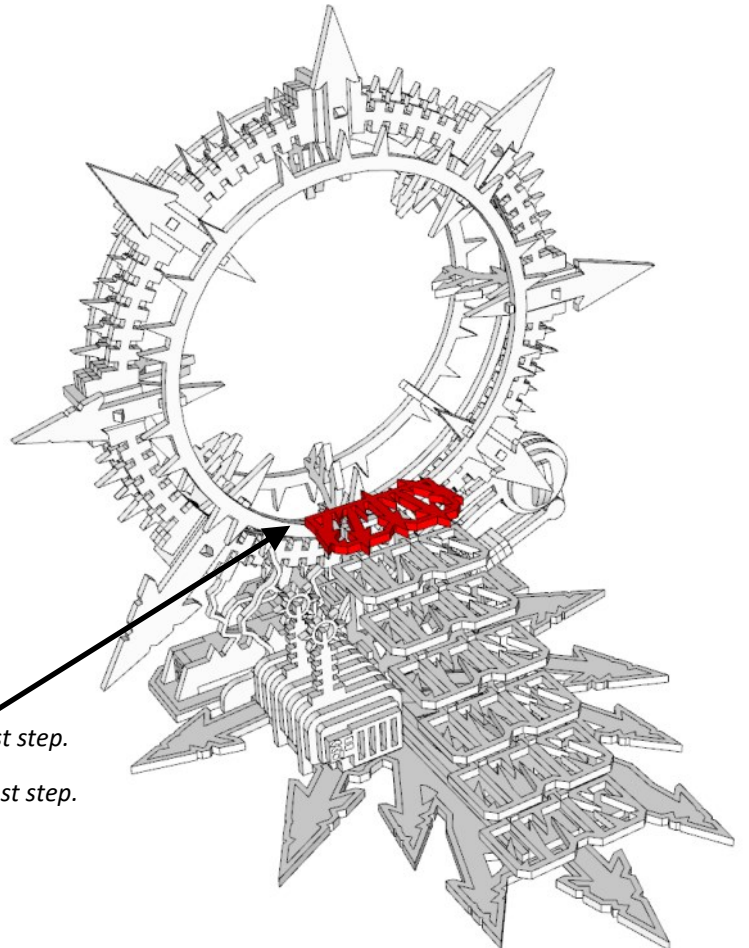

*Put a small arrow at the bottom so
it is not longer than the ground.*

Use the base to help align
the red ring.

**DO NOT GLUE TO THE
BASE YET**

*This is the last step.
It's also the last step.*
