

# MINIATURE SCENERY

## INSTRUCTIONS HYPERION REACTOR

### PREPARATION

You will need:

- Cutting mat or something to protect your table.
- PVA/Wood glue or superglue if you prefer.
- Small file or sand paper.
- Small blade / hobby knife

### GENERAL PROCESS

- Clear plenty of table space, you will need it.
- Parts should remove easily from the board by pressing through and popping them out. It's a good idea to cut through the tiny joins first though, and some parts (particularly smaller, more detailed parts) may need more careful persuasion.
- Use file or sand paper to remove the small bur caused by the connection to the frame.
- It's a good idea to familiarise yourself with how the pieces fit together before gluing.
- Slot the parts together as shown by the pictures below, applying glue wherever there is a connection. (unless shown otherwise)
- Parts may be a very tight fit, slight trimming or sanding of parts may be needed for ease of assembly.

Lots to line up here.  
It's a little annoying

Take your time

Make sure these line  
up for best look.

Note:  
extra engrave  
lines for front  
door

X6 =

These walls can be slotted into  
the base first if needed.

No slot this side

Make 6

These are very fiddly  
but they are the  
***LAST STEP.***  
(get it? Last step.. Haha)
