Contents may contain small parts. Not suitable for children under 6 years old. The exclusive copyright on the model designs and components within this case is the property of Miniature Scenery, 2016. All rights reserved.

MINIATURE SCENERY

PREPARATION

You will need:

- Cutting mat or something to protect your table.
- PVA/Wood glue or superglue if you prefer.
- Small file or sand paper.
- Small blade / hobby knife

GENERAL PROCESS

- Clear plenty of table space, you will need it.
- Parts should remove easily from the board by pressing through and popping them out. It's a good idea to cut through the tiny joins first though, and some parts (particularly smaller, more detailed parts) may need more careful persuasion.
- Use file or sand paper to remove the small bur caused by the connection to the frame.
- It's a good idea to familiarise yourself with how the pieces fit together before gluing.
- Slot the parts together as shown by the pictures below, applying glue wherever there is a connection. (unless shown otherwise)
- Parts may be a very tight fit, slight trimming or sanding of parts may be needed for ease of assembly.

Make sure the underside of the top ribs are lined up evenly.

Spending some time sanding the grips to a rounded shape will greatly enhance the look and feel of your model.

The insulator assembly Will look super cool if you sand the rings to a rounded profile, but you don't have to. It'll look good anyway.
