MINIATURE SCENERY

INSTRUCTIONS DOUBLE DECKER HOVER BUS

PREPARATION

You will need:

- Cutting mat or something to protect your table.
- PVA/Wood glue or superglue if you prefer.
- Small file or sand paper.
- Small blade / hobby knife

GENERAL PROCESS

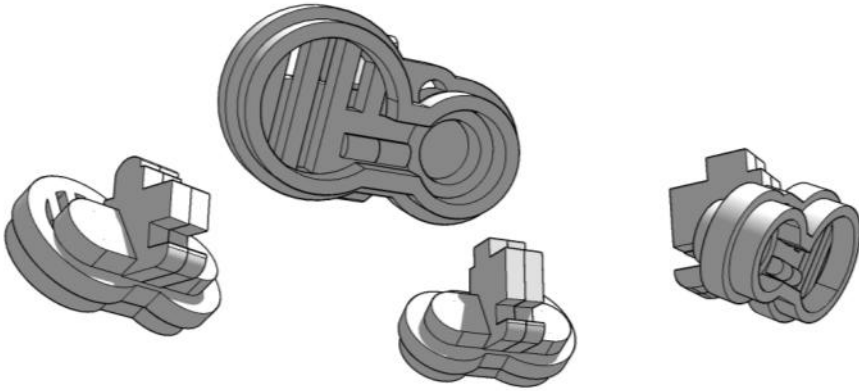

- Clear plenty of table space, you will need it.
- Parts should remove easily from the board by pressing through and popping them out. It's a good idea to cut through the tiny joins first though, and some parts (particularly smaller, more detailed parts) may need more careful persuasion.
- Use file or sand paper to remove the small bur caused by the connection to the frame.
- It's a good idea to familiarise yourself with how the pieces fit together before gluing.
- Slot the parts together as shown by the pictures below, applying glue wherever there is a connection. (unless shown otherwise)
- Parts may be a very tight fit, slight trimming or sanding of parts may be needed for ease of assembly.

A note on painting: Fairly obviously, If you are going to paint your Bus, there are going to be parts that are virtually impossible to reach at the end of the build. We suggest painting the interior components first, starting from the instructions on page eight. There are Photos of the finished, painted example at the end of the instructions.

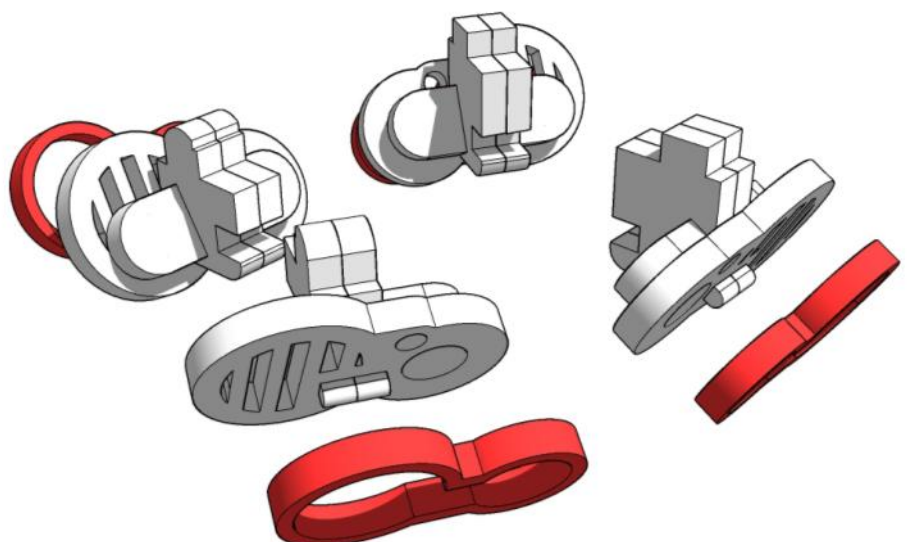

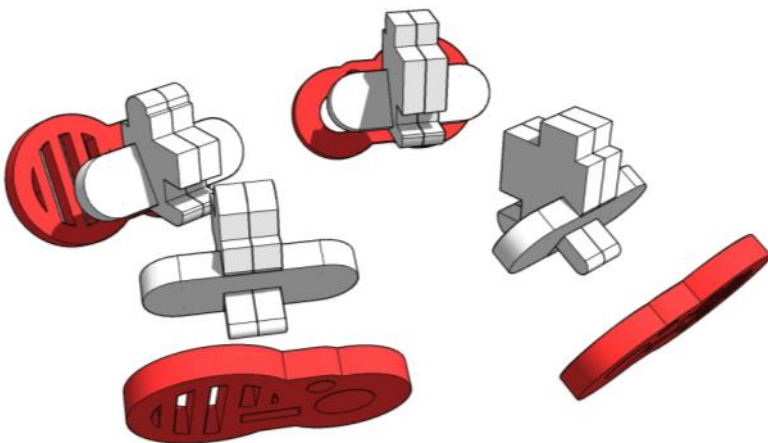

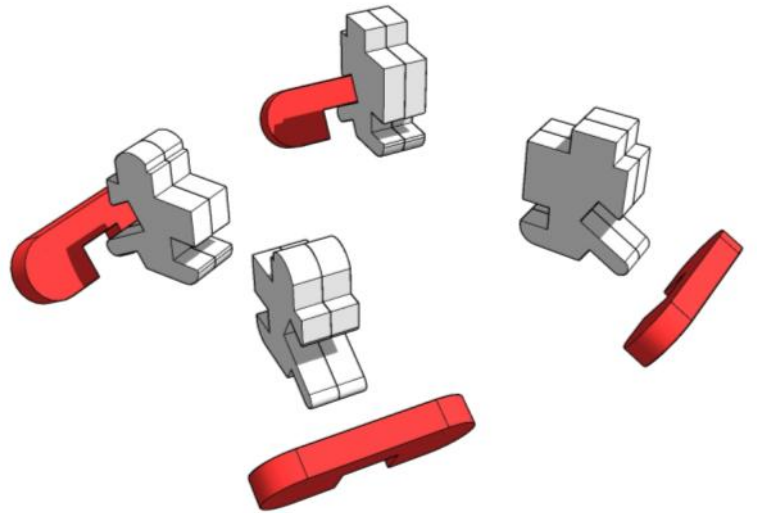

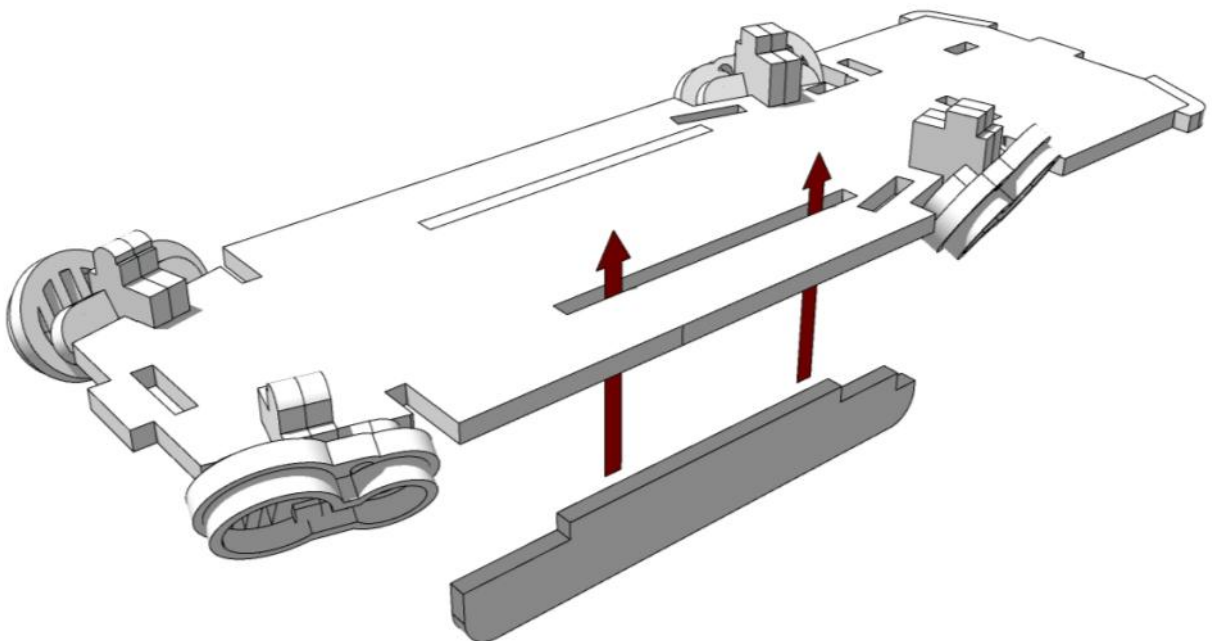

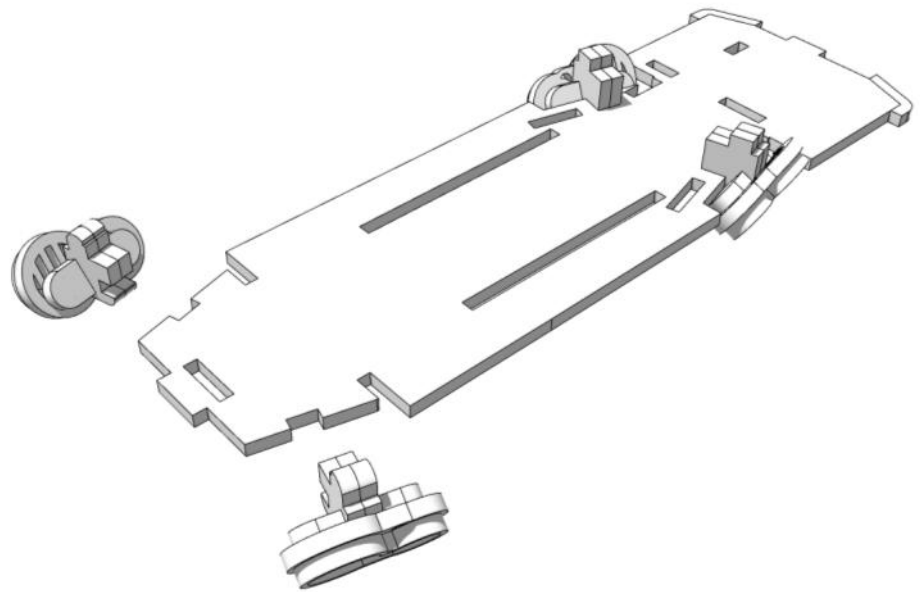

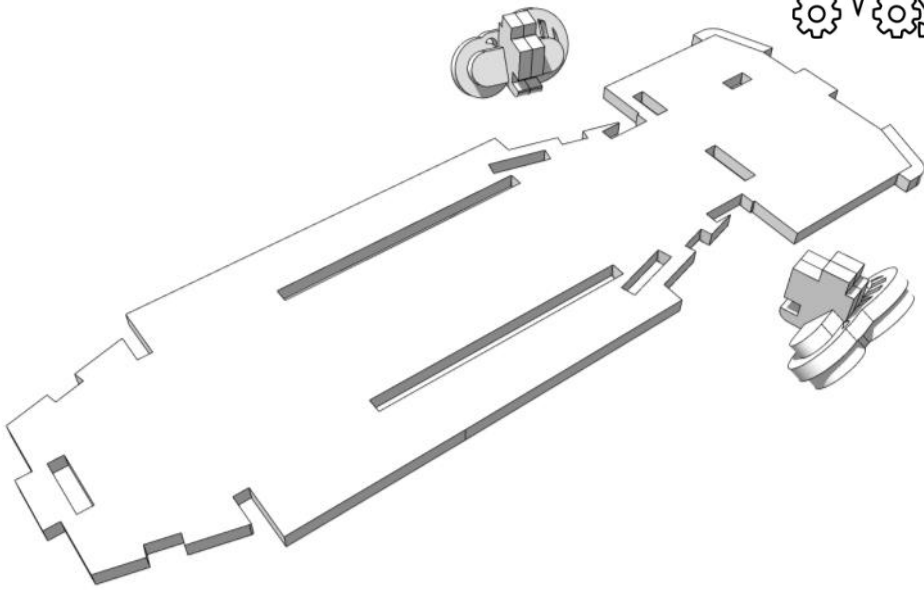

MINIATURE SCENERY

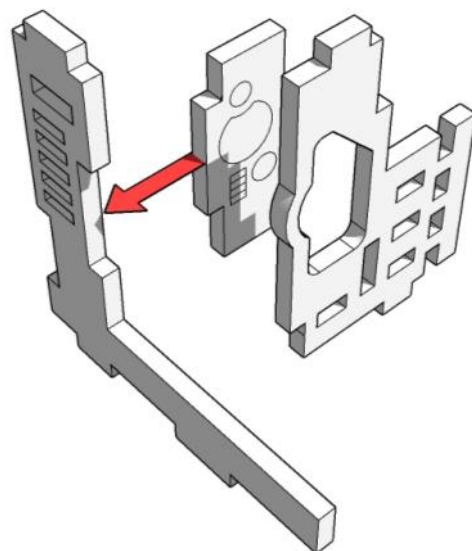

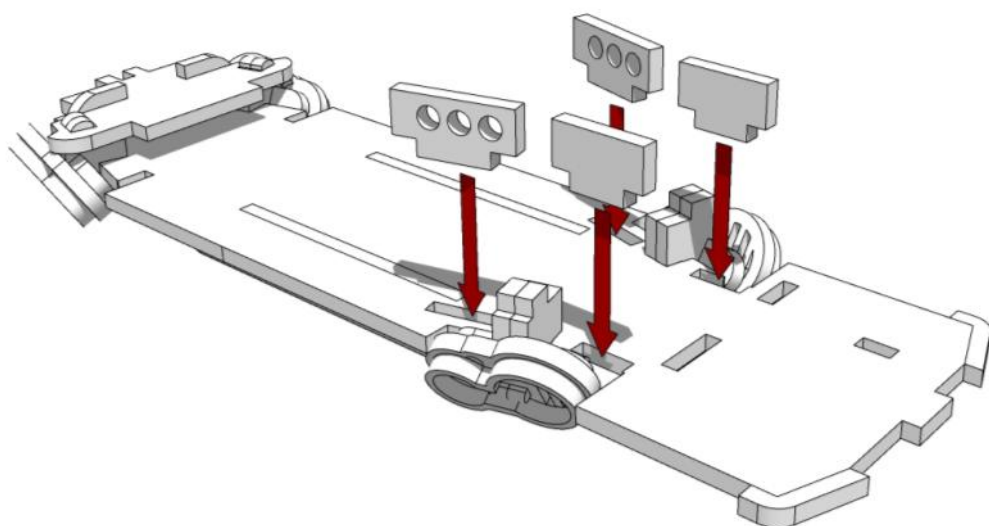

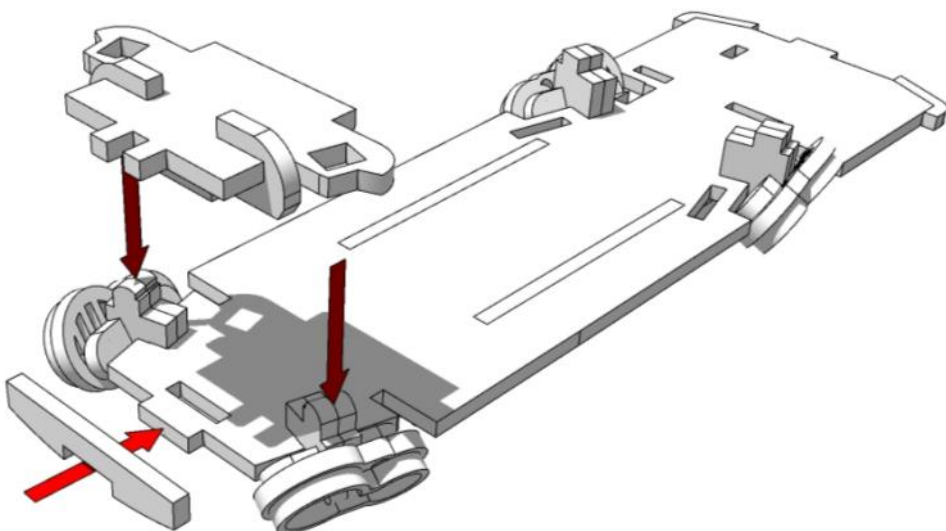

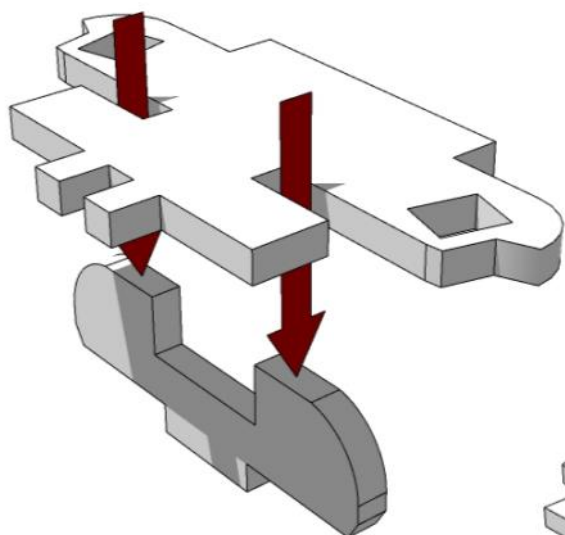

Thrusters: Make two left-hand and two right-hand versions.

I sanded the edges of the seats a bit to give them a friendlier , upholstered appearance and painted them before assembly.

The pattern was sprayed though a piece of aluminium mesh I had laying about, and the individual diamonds hand painted.

Yes, it took a while.

The Rest of the interior was given an authentic public transport feel with some enthusiastic application of acrylic paint.

The cup is just a rolled up piece of paper.

Note that this is an earlier version of the kit before we added tread to the steps.
