MINIATURE SCENERY

INSTRUCTIONS SKUTTLE TRANSPORT

PREPARATION

You will need:

- Cutting mat or something to protect your table.
- PVA/Wood glue or superglue if you prefer.
- Small file or sand paper.
- Small blade / hobby knife

GENERAL PROCESS

- Clear plenty of table space, you will need it.
- Parts should remove easily from the board by pressing through and popping them out. It's a good idea to cut through the tiny joins first though, and some parts (particularly smaller, more detailed parts) may need more careful persuasion.
- Use file or sand paper to remove the small bur caused by the connection to the frame.
- It's a good idea to familiarise yourself with how the pieces fit together before gluing.
- Slot the parts together as shown by the pictures below, applying glue wherever there is a connection. (unless shown otherwise)
- Parts may be a very tight fit, slight trimming or sanding of parts may be needed for ease of assembly.

DO NOT GLUE

APPLY GLUE WHERE INDICATED

Attach leg joints to side wall.
Repeat for both sides

NOTE: Etching on other side

NOTE: the orientation of
engraved triangles.
(Don't get these parts
upside down)

Mix up the different leg shapes to give movement.

NOTE:

Keep engraving on legs in most visible positions.

5 legs first half

3 legs second (leave last peg clear)

Lay these pieces flat. Position the circle so it goes through the wall at an angle

Glue both sides

Line up top of the wall with the roof

Does not matter where gaps in circle go.

Line these up

NOTE rotation.

You can change this if you like. It only changes options for spikes later.

Bulldozer blade optional

OR
